Problem To Solve	Causes	Solution : Lab Check In	Design + Impact
Initial setup took about **5-7** minutes **for the group!**	Come to Lab Upack setup laptop connect projector pull up Trello, find relevant task and then discuss		Alexa Skill that recognizes present people and pulls up task relevant to the meeting on a lab dashboard. Offload cognitive load while simultaneously setting up laptop, reduce time spent in opening tasks in Trello.

OK, but why ?

We were dreaming of building JARVIS.
This seemed perfect problem to solve.
